“ My favorite memory was in the drivers ed class at Harriton when he awarded me with the slowest reaction time of any student in the history of the class up to that time. I hope it still stands.

“ John and I met freshman year in college and then taught together in the same school district for 37 years. John then moved to West Chester where we were "gym rats" together! We shared many stories over the past 45 years. He made me laugh, and helped me through some difficult times. I will remember John with fondness for all his kindness to so many. I miss you my friend.....
