“ Dear Weecha,
Ed and I express our deepest sympathy on your loss. I remember the fun days in the field when we went with Prof. Fyfe to Jenner and Tiburon where you collected Tiburon albite. We always enjoyed seeing you both at GSA. Thanks to you both for your wonderful career contributions to Bryn Mawr.

“ Mineralogy was made more fun with all of Bill's puns. I also appreciated the care he took with undergrads to inspire them to become geologists.
